

SPECFLUE

PREVENT CHIMNEY FIRES! -WITH THE CCL.

Independent test results demonstrate that using the CCL can reduce creosote deposits in wood burning stoves and flues. The CCL in a fireplace can render the creosote more brittle and lower volatile organic compounds in the chimney. Subsequent mechanical sweepings are easier, cleaner and more effective.

Whether using an open fire or wood / multifuel stove, a brick, lined or stainless steel twin wall chimney, a CCL will help to prevent a chimney fire. It even insures you and your home against it.

- **The CCL has been tested by OMNI-test laboratories for its chimney cleaning capabilities**
- **Free insurance and guarantee with a leading insurance group in Europe**
- **Use every 60 fires or as needed**
- **No mess, No tools, No hassle**
- **The CCL does not take the place of inspection and professional cleaning by a qualified chimney sweep**
- **The CCL should not affect manufacturer's warranties on stainless steel flue products**

We are so confident in the product that if you are not fully satisfied you can return them to us for a full credit within 6 months of the purchase. You have nothing to lose!!
