TECHNOLOGIES

EXCLUDABLE VENTILATION

With the 'No Air' function, pellet stoves can significantly reduce the effect of forced ventilation, and in some models even eliminate it completely. This technology makes the stove quieter and more comfortable.

IGNITION IN 3 MINUTES

Product equipped with ceramic spark plug ensuring ignition times reduced by 40%.

WEEKLY ASH EMPTYING

The high capacity of the ash drawer allows the stove to be used for a week without emptying (average power consumption, 8 hours/day operation).

STRUCTURE COMPLETELY SEALED

Products built with Oyster technology do not consume oxygen by taking all the air from the environment outside so therefore can be placed inside every home properly insulated and within passive houses.

COAXIAL SMOKE DUCT

Coaxial smoke duct to evacuate the smoke and also to draw in the combustion air.

BRUSHLESS

Thanks to advanced technology, the new brushless gear motor guarantees high sound comfort (almost no noise) and substantial energy savings (consumption 90% lower compared to traditional motors). Used in the pellet loading system of all stoves.

DUAL CONNECTIVITY

For Maestro+ products, it is possible to control the stove from a smartphone over a home Internet network (Wi-Fi router) or through a Bluetooth connection (BLE Bluetooth Low Energy). Specifically, the connection via smartphone/stove remote control is controlled via BLE without using the home internet connection.

KIT WI-FI EASY CONNECT

For remote connection via the app. To be installed on the back of the stove, self-powered. Compatible with a 2.4 GHz frequency Wi-Fi router.

1 / Automatic self-cleaning brazier with comb mechanism for a more effective cleaning

2 / Dedicated brushless engine

3 / Utmost combustion efficiency thanks to the electronics that defines the mechanical cleaning in regular cycles or in case of blockages

4 / Availability both on water and high power air versions (14 kW)

5 / Ash pan allowing the emptying on a weekly basis or beyond

MANY SOLUTIONS TO TAKE ADVANTAGE OF ALL THE SPACE AVAILABLE IN YOUR HOME

CONFINED SPACES

Thanks to a very limited depth, these products are particularly suitable in small rooms or hallways.

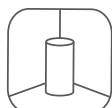

USE OF OLD FIREBOXES

These products are designed to be able to use old fireboxes that do not work and/or do not heat, thanks to a limited height (stoves) and the possibility of being incorporated (chimneys).

USE OF EXISTING FLUES

Thanks to the presence of an upper flue outlet, these stoves can take advantage of the existing flues, thereby optimising the living space and reducing installation costs.

CORNER SOLUTIONS

Stoves designed to take advantage of the corners in a home, which are generally used very little.

WALL-MOUNTED INSTALLATIONS

This is the classic solution: installed in front of a wall (stove) or inserted into the wall (chimney), these products blend in perfectly with the architecture of the room.

SEPARATION OF ROOM

Products that have two or three exposed sides, which allow for a view of the fire from separate rooms, thereby optimising the living space.

COMBUSTION CONTROL SYSTEMS

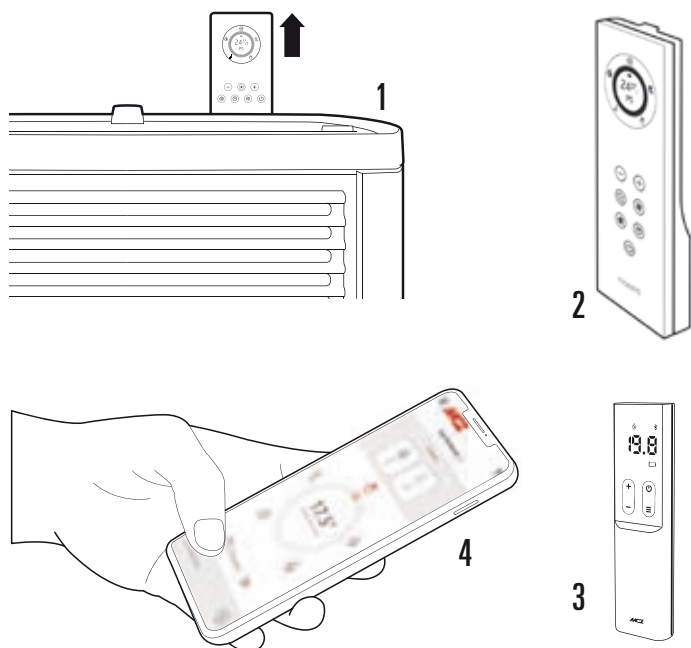

maestro+

MAESTRO+, THE MOST ADVANCED USER EXPERIENCE

- 1 / DUAL CONNECTION (WI-FI AND BLUETOOTH) INCLUDED.**
Everything you need to use the stove from your smartphone is already included, either at home or remotely Maestro+, without additional kits.
- 2 / PERFECT FLAME**
The combustion with Maestro is optimal, it generates less ash and leaves the glass clean. This results in lower consumptions, lower emissions and much less frequent cleanings.
- 3 / MORE USER OPTIONS**
Maestro stoves adapt to your style of use. When not at home you can use your smartphone (with stove connected via home Wi-Fi router), at home you can control the stove via the concealed control panel, smartphone (via Bluetooth) or remote control (optional).
- 4 / AUTOMATIC REMOTE FIRMWARE UPDATE**
(for WI-FI connected stoves).
- 5 / REMOTE DIAGNOSTICS AND ASSISTANCE**
(except operations that require a technician to be physically present).

MAESTRO+, STOVE CONTROL MODES

- 1 / DIGITAL PANEL**
If you are used to a more traditional style of use, all the features of the Maestro App are also available in a new control panel (standard) that integrates the ordinary and extraordinary features (emergency panel).
- 2 / FREESTANDING REMOTE CONTROL**
Remote control with ambient thermostat for room temperature control, always visible thanks to the e-ink display (optional).
- 3 / LIGHT REMOTE CONTROL**
Maestro+ thermostatic remote control unit. Small dimensions and stove control with only two buttons. 3 preset modes: manual, automatic, comfort. Bluetooth connection (optional).
- 4 / APP**
For remote stove control at home and away from home, today even easier to use.

WI-FI CONNECTIVITY FOR REMOTE CONTROL WITH "EASY CONNECT" DEDICATED APP

Exclusively for EASY LINE products, our range of the most user-friendly products.

TECHNOLOGIES

core

Core is the new firebox with patented technology that has shaken up the pellet combustion world: a wide natural flame similar to wood-fired products, one of the category's lowest emission levels, and pleasing to the eye either on or off. The CORE technology is protected by 3 patents.

Designed by the very flame, the firebox no longer has all the technical parts exposed. The combustion of the gases produced by pellets is harnessed to slow down the flame and provide a unique view of the fire.

Clean glazing for long periods of time thanks to the extremely low level of emissions

Firebox with AISI 304 stainless steel core and cast iron shell

Gasification and post-combustion in several points of the combustion chamber

With its self-cleaning brazier, no brazier cleaning is required

SILENCE IS A LUXURY, TREAT YOURSELF

The Comfort and Overnight modes make operation even quieter.

Thanks to its very low smoke extraction speed, ventilation is almost imperceptible.

Available for the models:
Eiko, Mako, Curve, Mood, Feel, Ego Air e
Comfort Air Matic, Musa/Club/Suite Air
Matic, Comfort Air Matic 12 e Comfort Air
Matic 14 kW

MAKO

ONE OF THE CATEGORY'S LOWEST EMISSION LEVELS

Performance is entirely met at all operating power levels.

Core's emission levels fall widely within the strictest European limits.

COMBUSTION CONTROL SYSTEMS

DUCTED AIR

DIFFUSER POSITIONABLE UP TO 8 METRES, FREELY

Comfort Air® can effectively carry the warm air (80°C) into other rooms up to a maximum distance of 8 meters. Unlike traditional systems in which the jets must be positioned at the top, Comfort Air® allows the jets to be freely positioned.

EASE OF INSTALLATION AND MAINTENANCE

With a significantly smaller diameter than other models on the market (60 mm and 100 mm), Comfort Air® ensures easier installation of the funnel into the wall, consequently limiting the necessary masonry works, which often take time and are very invasive, and making the fans easier to maintain.

TOTAL AIR DISTRIBUTION CONTROL

Fitting an electronic control unit, Comfort Air® can control up to 2/3 air flows (in closed fireplaces) to distribute heat and convey warm air into various rooms.

THE FIRST DESIGN DIFFUSERS

Comfort Air® is fitted with air distribution outlets that, for the first time, offer a true design piece. These outlets are ideal for integration into any furnishing, with their minimalist design and exclusive light and aromatherapy function that makes them unique on the market.

FORCED VENTILATION

A TRULY COMPLETE RANGE

To satisfy all requirements, in terms of power and operative functions.

WATER

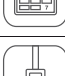

HOT RADIATORS FAST

Thanks to low thermal inertia, Hydro pellet stoves, once on, are able to heat your domestic radiators in just a few minutes (for some models there are also kits for connection to the hot water system).

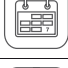

MAXIMUM HEAT EXCHANGE

About 90% of power rendered overall by the stove is transferred to the water guaranteeing excellent performance who those choosing radiators for domestic heating.

WHEN TO USE THE SINGLE ACCESSORIES - EXAMPLE

The two hood kits accommodate standard connections with air outlets located above the glass-fronted fireplace. For other types of solutions, the use of NV and FV individual accessories is required.

For example, to duct air to a distance of 6 m, with two forced ventilation air outlets, the following accessories are required:

	<p>MONO/BI/MULTI-DIRECTIONAL AIR OUTLET</p>	<p>As desired.</p> <table border="1"> <tbody> <tr> <td>4008021</td> <td>135.14</td> </tr> <tr> <td>4008023</td> <td>313.01</td> </tr> <tr> <td>4008024</td> <td>115.50</td> </tr> <tr> <td>4008025</td> <td>42.74</td> </tr> </tbody> </table>	4008021	135.14	4008023	313.01	4008024	115.50	4008025	42.74
