DEFRA APPROVED

# THE OXFORD RANGE

Crafted in Britain. Engineered for Performance.

Timeless by Design.

Designed and built in the UK, the Oxford Range combines traditional craftsmanship with modern combustion technology. Every stove in the collection shares the same clean-burning, high-efficiency firebox, delivering outstanding performance, intuitive control, and low emissions.

What sets each model apart is its exterior style, giving you the freedom to choose the perfect look for your home.

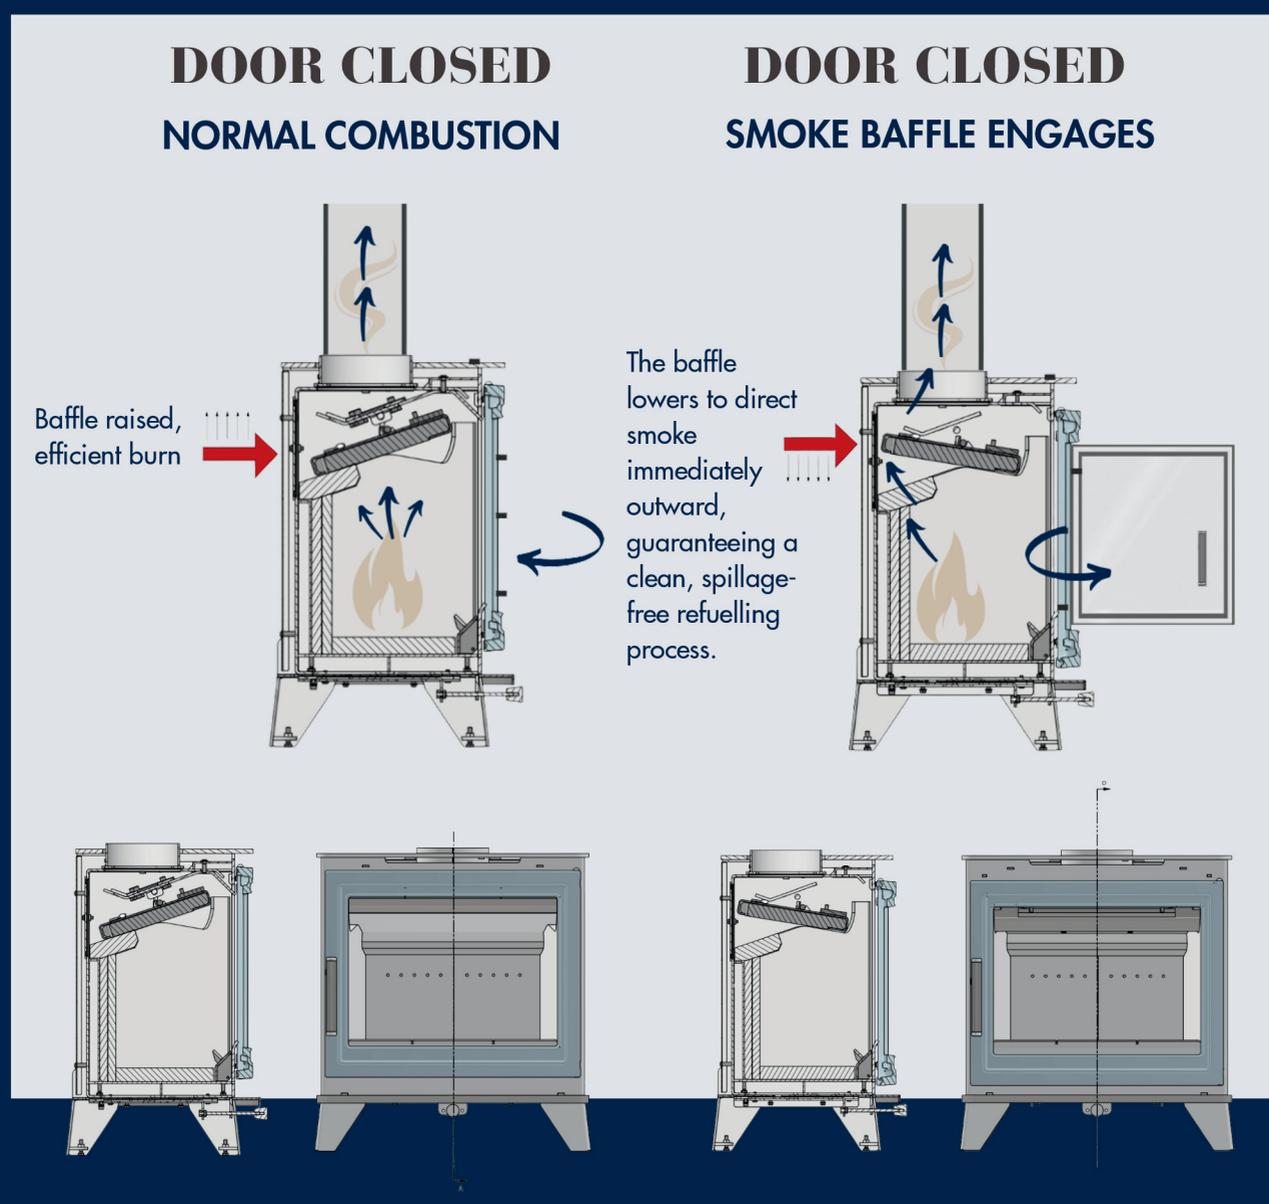

# DYNAMIC BAFFLE SYSTEM

The Oxford stove is equipped with an innovative Automatic Dynamic Baffle System (DBS).

This system features a drop-down baffle that automatically lowers at the front of the firebox when the door is opened.

This action creates a bypass route at the rear of the firebox, allowing smoke to exit directly, significantly reducing the risk of smoke escaping into the room during log reloading.
