SPECFLUE

Quality Products, Exceptional Service

## About Us

Leading the UK market since 1992, Specflue is more than a supplier—we're your long-term partner in heat. With 30+ years of expertise and a nationwide team of 60+, we deliver a complete "A to Z" service designed specifically for the trade.

## The Full Range

Stop searching, start installing. We stock everything you need in one place:

- Chimney Systems: Steel, plastic, ceramic, and pumice solutions.
- Heating Appliances: High-end wood, pellet, and bioethanol stoves.
- Commercial: Specialist systems and technical support for major projects.
- Ancillaries: Full range of cowls, flashings, and essential accessories.

## National Reach, Local Speed

We keep your projects moving. Our private fleet delivers across the UK from four strategic hubs:
**Sudbury (HQ)** | **Honiton** | **Castleford** | **Stirling**

## The Specflue Edge

- Technical Support: Direct access to industry-leading expertise.
- National Training Academy: Stay ahead with HETAS-approved training.
- Top Accreditation: Proud partners of SIA, HETAS, and clearSkies.

# Products you can see.

Service you can feel.

At Specflue, we know that a high-quality product is only as good as the service behind it. We don't just supply the trade; we partner with you to ensure your business runs smoothly.

## Why Our Service Leads the Industry

- **Founded on Care:** We were built on the belief that customers deserve more than a transaction, they deserve to be looked after.
- **Expertise on Tap:** Our team of 60+ specialists uses deep technical knowledge to solve your on-site challenges fast.
- **Reliability Guaranteed:** Our goal is simple: On Time, In Full, Every Time.
- **Own Fleet Delivery:** We use our own vehicles to ensure your orders are handled with care from our door to yours.

## Support That Saves You Time

- **Free Design Advice:** Get expert chimney design guidance to ensure your installs are safe and compliant.
- **Rapid Response:** We prioritise quick communication so you aren't left waiting for quotes or stock checks.
- **Peace of Mind:** With extended guarantees and industry-leading accreditations (HETAS, SIA, clearSkies), we stand behind every part we sell.

# Contents

For over 30 years, Specflue has led the UK flue and renewable heat industry, delivering safety and efficiency to every project. The Specflue Advantage ensures you receive reliable, on-time and in-full nationwide delivery, expert technical support from initial specification through to site installation, and a premium range of high-performance systems built for long-lasting quality.

OXFORD STOVES

# A HERITAGE OF WARMTH

*Proudly engineered in Britain, the Oxford Range marries classic artisan craftsmanship with the absolute pinnacle of modern heating performance.*

**Clean Burning:**
Enjoy exceptionally low emissions and peak fuel efficiency; use much less wood while producing minimal smoke for a greener, warmer home.

**10-Year Warranty:**
Built for longevity, every stove is backed by a full decade of warranty coverage, providing you with total peace of mind and support.

**Intelligent Smoke Control:**
Keep your living space completely pristine. Our innovative Dynamic Baffle System automatically engages the moment you open the door, instantly redirecting smoke up the flue for a flawless, smoke-free reloading experience.

*10 YEAR WARRANTY ONLY APPLIES WHEN FITTED WITH A SCHIEDEL CHIMNEY SYSTEM

# Timeless Classic.

The Oxford Classic W5 is the most refined model in the range. With elegantly curved legs and an arched detail across the base, it delivers a beautifully balanced look rooted in traditional stove design.

**Dimensions:**

- H: 580mm
- W: 610mm
- D: 409mm
- Weight: 87.9Kg

OXFORD STOVES

CRAFTED FOR WARMTH. BUILT FOR TRADITION.

# British Elegance.

## Oxford Standard

The Standard model offers a sleek, minimalist design with smooth lines and a modern profile. It is the ideal choice for those who prefer a clean, unfussy look without compromising on performance.

**Dimensions:**
H: 568mm | W: 500mm | D: 300mm | Weight: 75.5kg

## Oxford Traditional

With its more defined base and traditional styling, this model brings timeless charm to any space. It is a perfect fit for period properties, cottages, and homes looking for a classic touch.

**Dimensions:**
H: 568mm | W: 526mm | D: 360mm | Weight: 78.1kg

# Castle.

## COMBINING STYLE & SUBSTANCE.

**Transform your space with a fusion of functionality and visual appeal. The Castle Stoves range features three exceptionally efficient wood-burning models designed to be more than just a heat source.**

- **Captivating Views:** Designed with extra-large windows to provide a clear, enchanting view of the flames.
- **Contemporary Design:** Crafted to effortlessly complement any interior décor while elevating the ambiance of your living space.
- **High Performance:** Impressive heat output ensures even the coldest rooms are brought to a cosy temperature.

**All stoves come with a standard 12-month warranty for safety and performance.**

- **5-Year Extension:** Available when installed by a certified professional and registered within one month.
- **10-Year Extension:** Available when installed with a registered Schiedel flue system.

TermaTech

# Nordic Tradition. Limitless Choice.

A TermaTech stove is more than a heating solution; it is a lifelong investment in Danish design. The collection is built on a simple philosophy: aesthetics, quality, and function must exist in perfect equilibrium. Whether it's a slim, minimalist silhouette or a high-output soapstone masterpiece, we provide a Nordic centerpiece for every interior.

With integrated automatic air control, we've mastered the art of superior combustion, delivering maximum efficiency with effortless ease. Our stoves are made of durable cast iron and heat-absorbing soapstone, providing long-lasting performance, dirt resistance, and a classic natural look while radiating warmth after the fire has extinguished.

The Bioethanol collection

# Real Fire, No Chimney

TermaTech's new bio fireplace series combines the comfort of traditional wood stoves with advanced bioethanol technology. These units are designed for those who want the warmth and atmosphere of a fire but cannot install a chimney or wish to avoid the maintenance of wood.

**Plug and Play:**
No installer or chimney sweep is required; the units are ready to use immediately after setup.

**Eco-Friendly Fuel:**
The fireplaces run on bioethanol, a clean-burning alcohol derived from renewable energy sources like corn. They emit no smoke, ash, or soot.

**Effective Heating:**
While visually appealing, the flames also provide convincing and effective heat output.

# The Models

## Biotronic 400, TT23RG & TT20 Streamline R Bio

- NO CHIMNEY
- 2 FLAME HEIGHTS
- EASY INSTALLATION
- REMOTE CONTROL
- ENVIRONMENTALLY FRIENDLY
- EASY AND SAFE TO USE
- PATENTED BEV TECHNOLOGY
- NO ASH, SMOKE, OR ODOUR

# The Pellet Revolution: Automated Heating Excellence

While a traditional wood stove offers a classic ritual, MCZ Pellet Stoves are designed for those who demand high-performance heating with total autonomy. Forget hauling logs and manual lighting; experience a heating system that manages itself.

## Unmatched 95% Efficiency

An MCZ pellet stove is a commitment to precision, engineered to convert 95% of every pellet into usable heat.

- The Pellet Difference: Unlike wood stoves that require active tending, these units automatically regulate fuel delivery for constant, uniform warmth.
- The Benefit: Enjoy significantly lower heating costs and a smaller carbon footprint through optimised energy density.

## The Core Advantage

- **Eco-Friendly:** Emissions 40% lower than standard European limits.
- **Pristine Performance:** Cleaner combustion means less maintenance and a clearer view of the fire.
- **Advanced Tech:** Superior efficiency through innovative engineering.

**Clean air, high efficiency, and less hassle.**

## Total Control at Your Fingertips

Unlike traditional wood stoves, Maestro+ puts your heating on your schedule. No manual adjustments required, just smart, automated comfort.

- Remote Ignition: Use the app to start your stove or monitor fuel from anywhere.
- Voice Control: Simply ask Alexa or Google Home to adjust the temperature.
- Set & Forget: Schedule your heating for the entire week so your home is warm before you arrive.

MCZ

BETTER FOR YOUR HOME,
BETTER FOR THE PLANET.

# Why should you choose a **core** stove?

- ✅ **Spectacular Flame:** Advanced gasification mimics natural wood burning
- ✅ **15% Cost Savings:** High efficiency reduces pellet use by up to 15%
- ✅ **Eco-Friendly:** Emissions are 55% lower than European Ecodesign limits
- ✅ **Minimal Maintenance:** Self-cleaning features and weekly ash removal
- ✅ **Fast Ignition:** Ceramic glow plug ignites flame in under 3 minutes
- ✅ **Elegant Design:** Sleek firebox conceals technical parts when off
- ✅ **Multi-Night Warmth:** One fuel refill powers three evenings of warmth.

Steel Chimney Collection

# Core

Introducing Core, the new twin wall system from Schiedel. Engineered specifically for the modern installer, Core focuses on a curated set of high-performance components designed to make standard installations faster, simpler, and more cost-effective without compromising on Schiedel's legendary quality.

## Why the Trade Chooses Core:

**PUSH-FIT SIMPLICITY:**
INSTANT, SECURE CONNECTIONS—JUST PUSH AND LOCK.

**READY TO GO:**
LOCKING BANDS COME PRE-FITTED TO THE PIPE TO SAVE YOU TIME.

**SMART BRACKETS:**
WIDE-SET, PRE-DRILLED BACKPLATES ALLOW YOU TO MOUNT THE PIPE BEFORE THE BRACKET.

**INSTALLER FOCUSED:**
LIGHTWEIGHT HANDLING WITH A PREMIUM FLAT BLACK FINISH FOR A SEAMLESS LOOK.

**SUITABLE FOR:**
GAS, OIL, WOOD & MULTI-FUEL.
CONTEMPORARY & TRADITIONAL APPLIANCES & PELLET STOVES

| Feature | Details |
|---|---|
| Diameters | 100mm, 125mm, 150mm |
| Safety | 50mm distance to combustibles, with protected flooring |
| Warranty | 10-Year peace of mind guarantee |

**CE certified to EN 1856-1:2009 with below designations:**

Tested fully enclosed in a non-combustible shaft; floor penetration fully ventilated with ventilated fire-stop plates. With protected floors - 10mm non-combustible boarding.

**APPROVALS:**

- DN (100 – 150)
- DESIGNATION STRING
- T450 N1 W V2 L50050 G50 (Painted)
- T450 N1 D V3 L50050 G50 (Painted)

Steel Chimney Collection

# ICID

Elevate your home with the Schiedel ICID Plus, the premier "3-in-1" twin-wall insulated chimney system designed for total versatility and performance. Whether you use wood, multi-fuel, gas, or oil, this system delivers exceptional efficiency backed by a comprehensive Lifetime Guarantee. Available in a stunning matt black or polished stainless steel finish, the ICID Plus combines advanced safety engineering with a sleek aesthetic, making it the perfect choice for modern living.

1

**TWIST-LOCK BAYONET JOINTING SYSTEM:** SECURED BY LOCKING BAND.

2

**CORROSION RESISTANT:** LASER-WELDED 316L STAINLESS STEEL INNER LINER AND CASE.

3

**THERMAL EXPANSION:** INNER LINER EXPANDS THROUGH THE FEMALE COLLAR, EVEN DURING SOOT FIRES.

4

**LOW EXTERNAL TEMPERATURE:** ENSURES SAFETY AND EFFICIENCY.

5

**MOISTURE PREVENTION:** INWARD BEAD AT THE FEMALE END ACTS AS A CAPILLARY BREAK.

6

**EFFICIENT INSULATION:** 25MM MINERAL WOOL MAINTAINS FLUE TEMPERATURE, IMPROVES DRAUGHT, AND CUTS CONDENSATION.

7

**ADAPTABLE FOR POSITIVE PRESSURE:** QUICK-FIT LIP SEAL PACKS WITH GREASE SACHET FOR CONDENSING APPLIANCES.

# PREMIER FLUE LIMITED

Vitreous Enamelled Flue Pipe

Connecting your appliance with quality and precision. We offer two distinct ranges to suit every project and budget.

## Premier Vitreous Enamel

**The Professional's choice our market-leading, high-grade system. Designed for those who prioritise longevity and a flawless finish.**

- **Superior Quality:** Heavy-gauge steel, double-coated internally and externally.
- **Broadest Range:** The most comprehensive selection of bends, tees, and lengths on the market.
- **Built to Last:** Highly resistant to heat and corrosive flue gases.

Scan Me

## Specvit Enamel

The essential choice for reliable, cost-effective installations.

- **Budget Friendly:** High performance at a competitive price
- **Simple & Reliable:** Core components for straightforward installs
- **Fully Tested:** Durable and compliant for everyday use

## Short Offset Sections

Available in Premier & Specvit ranges for tight alignment spaces.

- 250mm Length
- 50mm & 100mm Offsets
- Cleaner installs with fewer bends and a neater finish

# Flexible Liner

## TecnoFlex Plus

Manufactured by Schiedel, TecnoFlex Plus is a twin-skin flexible liner designed for maximum durability. It features a corrugated outer skin for crush resistance and a smooth inner skin to assist with flow and maintenance.

- **Applications:** Suitable for Wood, Multi-fuel, Oil, and Gas applications.
- **Construction:** Available in both 316L and 904L grade stainless steel layers.
- **Performance:** Features an engineered joint design for high strength and flexibility during installation.
- **Available Sizes:** Widely stocked in 125mm, 155mm, 180mm, and 200mm diameters.
- **Warranty:** Includes a Lifetime Warranty for peace of mind.

## SpecFlex 2.0

SpecFlex 2.0 is a high-quality, twin-skin flexible chimney liner manufactured in the UK. Designed specifically for lining existing masonry chimneys, it provides a robust and dependable solution for modern heating requirements.

- **Applications:** Fully compatible with Wood, Multi-fuel, Oil, and Gas appliances.
- **Construction:** Manufactured with 316L grade stainless steel for both the inner and outer skins.
- **Performance:** Rated for high-temperature applications up to 600°C (T600 N1).
- **Available Sizes:** Stocked in 125mm and 150mm diameters.
- **Warranty:** Comes with a 10-year manufacturer warranty.

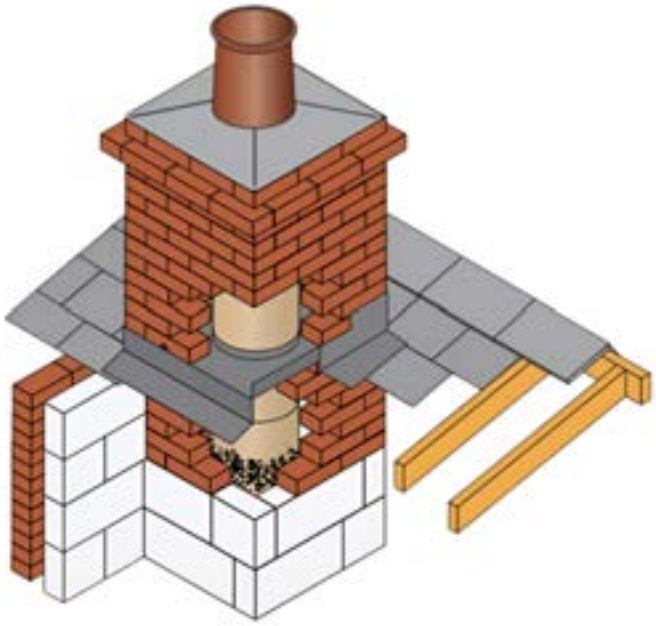

# Ceramic

For over 75 years, Schiedel has pioneered ceramic chimney systems crafted from natural clay. Using the same high-performance properties as aerospace heat tiles, our systems offer exceptional thermal insulation and a healthy indoor climate.
Engineering & Safety

- **W3G-Tested:** Profile ceramic tubes are moisture-proof, corrosion-proof, and gas-tight.
- **Fire Resilient:** Engineered to resist soot fires without cracking for decades of reliability.
- **Certified:** Fully compliant with the latest CE standards and building regulations.

## Efficiency & Value

- **Easy Installation:** Lightweight, modular designs like the Swift and Swift Air systems.
- **Cost-Effective:** Reduces reliance on gas heating, lowering energy bills.
- **Built to Last:** A robust investment that enhances home safety and property value.

Mineral Chimney Collection

# Pumice

Crafted from natural volcanic pumice sourced from Iceland's Hekla Volcano, Schiedel chimney and fireplace systems combine exceptional insulation, lightweight construction, and industry-leading durability.

Whether you're building a contemporary home, restoring a period property, or creating an outdoor living space, Schiedel delivers high-performance flue solutions designed to last a lifetime.

## Pumice Liners

Reliable solutions for new-build and renovation projects.

- Fuel, gas & biomass compatible
- 15 sizes from 150mm–1000mm
- Ideal for stoves & open fires

## Isokern Double Module (DM)

Advanced systems built for strength and performance.

- Staggered joint stability
- 0mm combustible clearance*
- Lightweight, durable construction

*On straight rendered stacks.

## Trusted By Professionals

**Instant Draw Performance**
Rapid heat-up creates a strong chimney pull for cleaner, more efficient combustion.

**Cleaner Burning Fires**
Keeps flue gases hotter for longer, reducing soot build-up and condensation.

**Exceptional Thermal Safety**
Outstanding resistance to thermal shock helps prevent cracking and structural damage.

**Lightweight & Easy To Install**
Interlocking pumice components reduce handling time and speed up installation on-site.

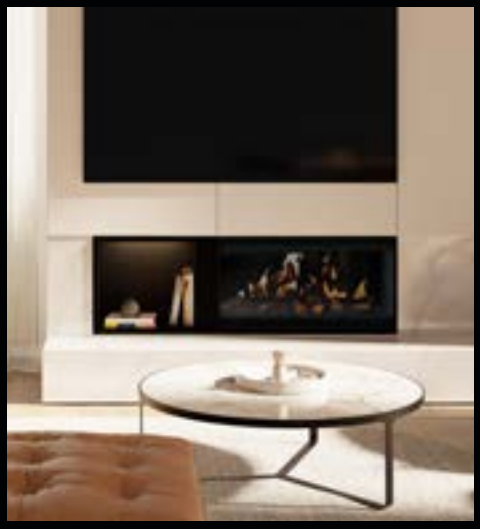

**Naturally Insulating Material**
Retains heat efficiently while improving overall chimney performance.

FIRE BY escea.

Born in New Zealand, Escea combines industry-leading efficiency with architectural elegance. The Signature Collection redefines the electric fireplace, offering the soul of a wood fire with modern simplicity.

## The Signature Collection

This is the electric fireplace, redefined. The Escea Signature Collection delivers the unmatched authenticity of a traditional wood fire—without the installation headaches.

- **Holographic Realism:** Advanced mapping projects dynamic flames and sparks onto lifelike logs.
- **Total Freedom:** 100% electric. No flues, vents, or consents required—install anywhere.
- **Smart Design:** Safe for TV mounting with "cool touch" glass.
- **Year-Round Ambience:** Delivers up to 3kW of heat or flame-only mode for warmer months.

Available in three versatile, inbuilt sizes—the compact LE800 and the expansive linear LE1000 and LE1550—this collection is engineered to be the stunning focal point of your home.

# The LE800 | Compact Sophistication

The LE800 proves that you don’t need a massive footprint to make a massive impact. Perfect for intimate lounges, luxury master suites, or high-end apartment living, this model brings the soul-soothing warmth of a real wood fire into any space. It’s the ultimate choice for designers looking to add a touch of "boutique hotel" luxury to smaller rooms without sacrificing wall space.

# The LE1000 | The Modern Standard

Striking the perfect balance between scale and versatility, the LE1000 is the definitive choice for the contemporary home. Its generous viewing window provides a stunning wide-screen display of dancing flames and glowing embers, acting as a sophisticated centerpiece for the modern living room. It’s a masterclass in proportion, designed to sit beautifully beneath a wall-mounted TV for a clean, integrated entertainment hub.

# The LE1550 | Compact Sophistication

For those who live life on a grander scale, the LE1550 is the unrivaled flagship of the series. This expansive, ultra-wide panoramic fire is engineered for high-impact, open-plan spaces. It doesn't just sit in a room; it commands it. With its elongated flame pattern and breathtaking realism, the 1550 creates a dramatic visual anchor that defines luxury living. It is, quite simply, the finest electric fire experience available today.

SPECFLUE

# Dedicated aftercare parts

A high-quality flue installation is only as good as the components that support it. At Specflue, we stock a comprehensive range of high-quality ancillaries designed to complete your installation, ensure regulatory compliance, and keep your system running at peak performance.

## Essential Ancillaries for Every Install

Beyond the pipework, the right accessories are vital for the longevity of the system and the safety of the home. Our range includes:

- **Cowls & Terminals:** Engineered to prevent water ingress and bird entry while managing downdraught to ensure a consistent flue draw.
- **Draught Stabilisers:** Regulates airflow to maintain the perfect combustion environment, particularly in tall chimneys or exposed locations.
- **Insulation & Register Plates:** High-performance insulation reduces soot build-up, while our range of register plates secures masonry chimneys against debris.
- **Direct Air Kits & Flue Boxes:** Essential for modern airtight homes, providing dedicated combustion air or secure venting for domestic gas appliances.
- **CO Alarms:** High-sensitivity detection, essential for legal compliance and total peace of mind.
- **Performance & Care:** Heat-powered stove fans to maximize circulation, ash vacuums for cleaning, and high-temperature consumables like stove rope and adhesives.

**Our Warranty Commitment**
We stand behind our range with robust guarantees reflecting the highest British and European manufacturing standards:

- **Flexible Liners:** Up to 10 years on Specflex 2.0 systems.
- **Twin Wall Systems:** Premium ranges carry 10 to 20-year warranties.
- **Ancillaries:** Cowls and fixings meet BS EN 1856 standards for harsh environment resistance.

Scan Me

# Precision in every project.

Specflue moves beyond simple product supply to offer a true technical partnership. We understand that commercial heating is the core of building safety and efficiency; therefore, whether we are working on heritage restorations or large-scale urban developments, our focus remains on precision planning.

By combining specialist expertise with high-performance flue systems, we help our clients optimise energy ratings while meeting the most stringent safety standards.

**Site Surveys:** On-site assessments for retrofits to ensure infrastructure compatibility and accurate material scheduling.

**Bespoke Design & Calculations:** Expert BS-EN compliant flue calculations ensuring optimal safety and efficiency.

**Logistics Excellence:** Reliable delivery via a private fleet and nationwide depots, featuring timed slots for restricted city access.

**Specflue understands that a "one size fits all" approach is impossible in the commercial sector. Different industries demand unique technical specifications:**

### Data Centres & Hospitals

We design pressure-tight exhaust systems for emergency generators and plant rooms.

For hospitals, we focus on clinical safety; for data centres, we prioritise acoustic attenuation to manage noise levels in busy urban hubs.

### Education & Hospitality

We manage complex multi-boiler cascades for schools and universities.

In hospitality, we balance guest comfort with compliance, designing high-capacity kitchen extraction and sustainable biomass venting for modern rural resorts.

### Food & Manufacturing

We provide steam boiler and oven exhaust systems for large-scale bakeries.

In manufacturing, our team manages high-temperature exhaust and chemical fume extraction, ensuring air quality and total workforce protection at all times.

## Leading Product Ranges

The backbone of Specflue's success is its massive stock holding of premium components. Their commercial portfolio includes:

- **Twin Wall Systems:** High-specification, insulated stainless steel chimneys designed for high-pressure and high-temperature applications (up to 1000°C).
- **Single Wall Solutions:** Precision-engineered for condensing boilers and positive pressure applications, often featuring pre-fitted seals for ease of installation.
- **Specialist Components:** Including draught control systems, flexible liners for historic chimney restoration, and specialised plastic venting for modern high-efficiency appliances.

## Services

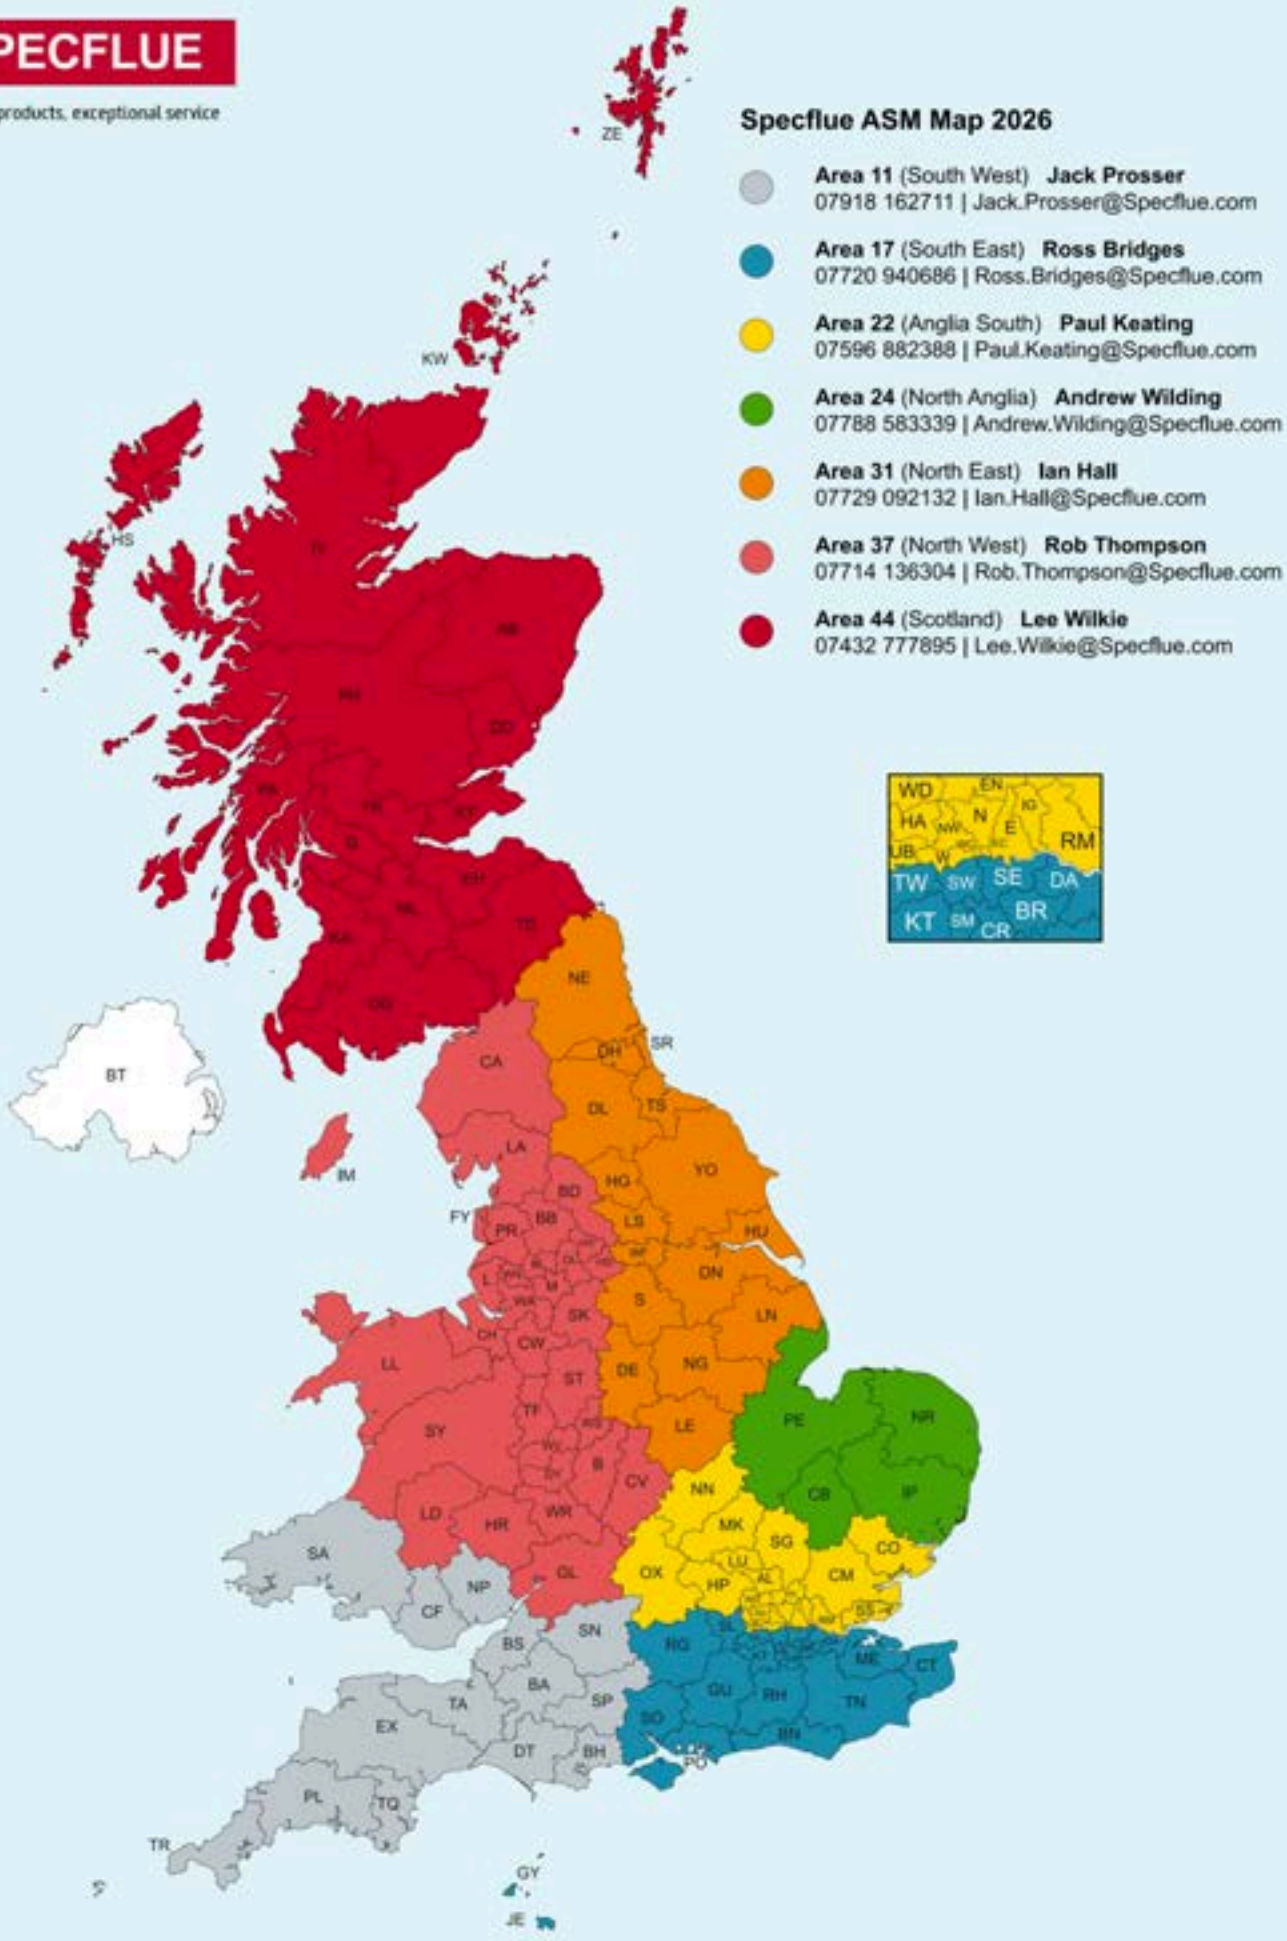

- ✓ Site Surveys
- ✓ Provision of designs and material schedule
- ✓ Large stock holding with products off the shelf
- ✓ Specialist/custom components
- ✓ Flue calculations to BS-EN industry standards
- ✓ Installation guidance and advice
- ✓ Dedicated in-house Technical Team
